About the College

St. Mary's College, a catholic institution of higher education for women, established in 1948 enjoys a heritage of 73 years as a Christen Minority Institution. The college is accredited with 'A+' grade by NAAC in the fourth cycle. Affiliated to Maronmaniam Sundararam University, Tirunelveli, the College offers graduate, post-graduate, M.Phil. and Ph.D. programmes in various disciplines. The college has obtained Autonomous Status in the year 2009. Recognizing the great potential within the campus, the NAAC has re-accredited the institution with 'A+' grade in its fourth cycle. With the motto FIDE VIVANT (Live by Faith) the college has groomed generations of young women through its conscious efforts and has enlightened the vision of its pioneers by imparting value conscious integrated education to the young women ensuring their continual growth for more than seven decades.

About DBT STAR College Scheme

"Star College Scheme" has been initiated by the Department of Biotechnology (DBT) to support colleges offering undergraduate programmes to promote and facilitate science teaching. The scheme aims to hone the skills of the teachers by helping the institution to organize faculty training programmes, to offer improved curriculum keeping up with the current trends and to emphasize applied learning and practical training for students by providing access to specialized infrastructure and consumables. Star college scheme is formulated with an aim to enhance conceptual clarity, develop scientific thinking and creativity among students.

It enables interactive participation among different scientific disciplines and departments with the holistic approach towards science rather than compartmentalized thinking. DBT has supported around 200 undergraduate colleges across the country in the past 9 years. Star College scheme was sanctioned in March 2019. Four departments of the college namely Physics, Chemistry, Botany and Zoology have been recommended by the Department of Biotechnology (DBT), Ministry of Science & Technology, Government of India, New Delhi, to receive financial assistance under the Star College Scheme.

About FDP

Globalization and Industrial necessities stay ahead of the curve in terms of innovation and creativity in order to compete in the technological and commerce markets. The word intellectual property refers to the use of the human brain for creation and creativity. The ultimate idea that led to the innovation or creation is an intangible property of the person who put up the effort to make it happen. Similar to physical property, intellectual property rights (IPR) are territorial rights that allow an owner to sell, buy, or license his Intellectual Property (IP). The development of any society directly depends on IPR and its policy frame work. Inventions died; there was a high risk of infringement, economic loss, and the end of an intellectual period in the country due to a lack of IPR understanding. Hence, there is an urgent need for IPR information to be disseminated in order to promote indigenous innovations and breakthroughs in the sphere of research and technology. The broad scope of this FDP will cast wide information to be needed for IPR.

Programme

21st February, 2022

Day 1

04.15 P.M. - 06.00 P.M.

Session Address
